

Homework 20.03.20

Name: _____

For working at home, we are providing an exercise book to record any work set online. We recommend you record all of your home learning with the date you completed it in this book as evidence of all of the good work you do!

Further home learning will be set through the school website on the “Skiddaw” page under the “pupils” tab. You can email school staff using the class email: skiddaw@levens.cumbria.ac.uk

Your first task is to design a front cover for the book on the plain paper provided. This can be anything you like so get creative! If you’re particularly proud of it, send us a picture and we’ll put it on the website!

English:

Please make sure you read regularly and record this in your reading record. Mr Dean would also like you to choose your favourite book and write a short paragraph explaining why you like it so much!

Maths:

In maths we have been looking at statistics recently. Your challenge is to do a survey of your family and find out the most popular indoor activity. Record the information in a tally chart and show the data on a block chart (year 2) or bar graph (year 3 and 4). Maybe you could try some of the activities yourself!

Science:

Materials and objects can either be a *solid*, *liquid* or *gas*. Make a list of all of the things you can find around the home in these three groups. Be careful, gasses are really hard to spot!

Extension: Can you think of a material that can change from solid to liquid to gas? How do you make it change?
